

# Dear Health Secretary

Over 1650 healthcare professionals write to  
The Rt Hon Sajid Javid, MP, Secretary of State  
for Health and Social Care

Our **duty** of care

Our **duty** of **care**

## Dear Health Secretary

**As healthcare professionals, we have a legal duty of care for the safety and wellbeing of our patients. We write with great concern regarding the introduction of a Bill to legalise assisted suicide.**

The shift from preserving life to taking life is enormous and should not be minimised. The prohibition of killing is present in almost all civilised societies due to the immeasurable worth of every human life. **Everyone has a right to life** under Article 2 of The European Convention on Human Rights<sup>1</sup> such that no one should be deprived of that life intentionally.

It is impossible for any government to draft assisted suicide laws which include legal protection from future extension and expansion of those laws. **Canada has clearly demonstrated that safeguards can be eroded in a matter of just five years.**<sup>2</sup> **The prohibition of killing is the safeguard. The current law is the protection for the vulnerable.** Any change would threaten society's ability to safeguard vulnerable patients from abuse, it would undermine the trust the public places in physicians, and it would send a clear message to our frail, elderly and disabled patients about the value that society places on them as people.

Far from one person's decision affecting no one else, it affects us all. Some patients may never consider assisted suicide unless it was suggested to them. The cruel irony of this path is that legislation introduced with the good intention of enhancing patient choice will diminish the choices of the most vulnerable. **More than 1 in 60 deaths in Belgium occurred with no consent from the patient** – those in coma, confused, or the elderly are euthanised because their lives are considered not 'worth living'.<sup>3</sup>

We would not take patients' lives – even if they asked us to – but for the sake of us all, and for future generations, we ask that the law remains unchanged.

Yours sincerely,  
Dr Gillian Wright, MD MPhil

Researcher in Medical Ethics, Glasgow

Our **duty** of care

# Dear Health Secretary

1650 healthcare professionals write to The Rt Hon Sajid Javid, MP, Secretary of State for Health and Social Care

[www.ourdutyofcare.org.uk](http://www.ourdutyofcare.org.uk)

Our Duty Of Care is a group of UK healthcare workers who oppose the intentional killing of patients by assisted suicide or euthanasia. The campaign is financed by the Care Not Killing Alliance and administered by David Randall, a specialty registrar in renal medicine working London, and Gillian Wright, a former palliative care doctor based in Scotland.

It is supported by a wide range of healthcare professionals, and has campaigned during the membership polls run by the Royal College of Physicians, Royal College of General Practitioners and British Medical Association to maintain medical opposition to assisted suicide.

Except as stated, no part of this letter shall be reproduced without written permission of the publisher.
